P5MyCarePlan Fact Sheet

An app built to support Resident & Client dignity & choice

Using the P5MyCarePlan App, the resident/client or their family/representative, can view or enter details they want to, add pictures or documents they want to, view pictures added by staff onto their profile, view any Events or Tasks associated with them – all from a tablet or phone of their choice.

Organisations can EDIT the fields that appear in the App or ADD other fields to appear in the App from their own Platinum 5 program when wanted. Staff can set or view all details – photos, Events, Documents, forms - on their computer or tablet. All those with permissioned access to the App can either Read or Write details into any of the 30 mini 'P5MyCare' forms, and view the auto-Summary Care Plan.

P5MyCareplan supports residents/clients and families/representatives have an easy to use communication forum, with staff and management through simple to use, advanced "App technology"

Easy to support, easy to communicate

Through technological innovations, the Care Sector now has a service like no other!

- + Any permissioned person can access the resident / client's P5MyCareplan App from a Tablet or their phone, from anywhere.
- + Security is maintained through a set Username & Password and a Setting that must be issued by the organisation to link to the resident/client's Platinum 5 details.
- + Staff at the Service can open the client's home page on their computer and add details for the permissioned person's to access.
- + The resident/client can then discuss and liaise with their family/representative or staff based on what is viewed on the App, and discuss, reminisce, assess and plan needs.

When residents / clients enter details into their mini 'P5My' forms, the details feed into the Platinum 5 program and the resident/client's care plan.

- + Tasks/Events displayed in the App come from those linked to the resident's profile.
- + Photos and documents loaded into Platinum 5 by staff can be made available to the App with the touch of a button. Residents/clients or families / representatives can then view photos or ask to have a document copy as named in the App e.g. pathology results or specialist reports or hospital discharge reports.
- + Residents/clients can take photos from their phone/tablet for staff to view in the home page.
- + Organisations determine which fields are Read or Write and which feed to the care plan when they use Platinum5

Clients can complete the following 'mini forms' by either speaking into the App or typing their preferences and goals of life, which all link to the person's Summary Care Plan:

- Summary Care Plan
- My Care Plan Review - Feedback
